

SANMINA-SCI

Cables

Monterrey, Mexico

Low-cost manufacturing solution for cable assemblies.
Comprehensive manufacturing services in a convenient, low-cost site.

Did you know there's a low-cost manufacturing center for cables and cable assemblies within driving distance of the United States? That's right. Sanmina-SCI's Monterrey facility is strategically located in northeastern Mexico, where it provides you the low-cost manufacturing and convenient logistics for all your cabling needs. Our Monterrey facility offers the latest in cable technologies, including molding, crimping, fiber-optic and hand-soldering techniques for a variety of cable types. And with testing and delivery services, this facility gives you a complete manufacturing solution.

Manufacturing Services

- Cables assembly
- Electromechanical assembly

Engineering Services

- Process development

Testing Services
