

SANMINA-SCI

Cables

Greenock, Scotland

High-quality cable and harness assemblies.

Design, manufacturing and delivery solutions that suit your production needs.

For high-quality cable assemblies, Sanmina-SCI's Greenock facility delivers the technology you need with a responsiveness you will enjoy. Our Greenock facility specializes in the design and manufacture of cable and harness assemblies and Rigid and Flex circuit assemblies. From the early stages of your product, our Greenock facility provides experienced design support to ensure your cable assemblies are both compliant with customer specifications and economical to produce. To offer you a greater spectrum of services, our Greenock facility complements its in-

house manufacturing capabilities with a number of strategic partnerships, delivering you responsive service in cable, harness and circuit assemblies to small box builds.

Manufacturing Services

- Complex discrete cable harnesses
- Coax products: SMA, SMB, SMZ, MMCX, BNC
- Micro-coax assembly using discrete and bundled cables, in-crimp and fine-line solder versions
- Small boxbuild, adaptors, terminators
- High-speed I/O cable links
- Custom Flex and Rigid solutions

Engineering Services

- Application and design engineering
- Prototyping
- Process development
- Project and ECO management

Testing Services

- Eye pattern, attenuation, impedance, bit error rate
- Time delay and skew
- FEXT, NEXT, VSWR

Technologies

- Lead-free processes
- Termination by application crimps, IDC and fine-line solder

Logistics Services

- Hub services
- EDI
- Kitting
- Materials management
- Product life spares support

Certifications

- ISO 9001:2000
- ISO 14001
- TS 16949
