**SANMINA-SCI'S MEDICAL DIVISION CAPTURES TWO 2004  
FROST & SULLIVAN AWARDS**

*Medical Division Receives Awards for Market Leadership and Quality Product Leadership*

**San Jose, Calif. - May 13, 2004** - Sanmina-SCI Corporation (NASDAQ NM: SANM), a leading global electronics manufacturing services (EMS) company, today announced its Medical Division has received two prestigious 2004 Frost & Sullivan Awards for Market Leadership and Quality Product Leadership. The company's Medical Division, the largest medical EMS provider in the world, provides a comprehensive array of services to medical OEMs, including best-in-class design, engineering, manufacturing and regulatory support.

"We are honored to be recognized with these prestigious awards," said John Hendrick, Executive Vice President of Sanmina-SCI's Medical Division. "We believe our growing share of the \$40 plus billion medical market benefits from our vast experience in designing and manufacturing therapeutic and diagnostic devices. Each of our nine medical device-manufacturing sites around the world is an ISO 13485, FDA registered facility. Such a focus on regulatory compliance gives our diverse world-class customers confidence that their products will be designed and manufactured with highest standards of quality and safety."

Sanmina-SCI is one of the few EMS providers with a dedicated medical electronics manufacturing division. Its factories located in all regions of the world enable it to meet the unique needs of the medical electronics industry and allow it to provide services that are unparalleled in the world.

The Frost & Sullivan Market Leadership Award is given to the company that has displayed excellence in all areas of the Market Leadership process, including the identification of market challenges, drivers and restraints, as well as strategy development and methods of addressing these market dynamics. Sanmina-SCI scored higher than the competition in medical experience, extent of regulatory knowledge and size and number of manufacturing facilities around the world. The Frost & Sullivan Award for Product Quality Leadership is bestowed upon the company that has demonstrated superior quality control over their existing competitors in product manufacturing. Sanmina-SCI's focus on quality control is validated by

the repeat buying behavior of its customers and its long tenure in such a quality-conscious marketplace.

Sanmina-SCI's Medical Device Division leverages more than 20 years of experience working with leading medical OEMs, providing design and manufacturing services for a range of cutting edge medical devices as diverse as nuclear magnetic resonance imaging (NMRI), vascular imaging, and blood and cellular analysis. Sanmina-SCI has also developed a broad spectrum of therapeutic products, including brain stimulators, dialysis, ophthalmic, and urology equipment.

**About Sanmina-SCI**

Sanmina-SCI Corporation is a leading electronics contract manufacturer serving the fastest-growing segments of the global electronics manufacturing services (EMS) market. Recognized as a technology leader, Sanmina-SCI provides end-to-end manufacturing solutions, delivering unsurpassed quality and support to OEMs primarily in the communications, defense and aerospace, industrial and medical devices, computer technology and multimedia sectors. Sanmina-SCI has facilities strategically located in key regions throughout the world. Information about Sanmina-SCI is available at [www.sanmina-sci.com](http://www.sanmina-sci.com).
